UNIFORM
CRIME REPORTS

FOR THE UNITED STATES
AND ITS POSSESSIONS

Volume I - Number 1
MONTHLY BULLETIN FOR AUGUST, 1930

---

*9353.93
V. 1-5
1930-34

COMMITTEE OF THE
INTERNATIONAL ASSOCIATION OF CHIEFS OF POLICE
ON UNIFORM CRIME RECORDS

(II)

UNIFORM CRIME REPORTS

SPECIAL ANNOUNCEMENT

By an act of Congress approved June 11, 1930, the National Division of Identification and Information of the Bureau of Investigation of the United States Department of Justice was granted authority to collect and compile crime statistics. Effective September 1, 1930, the bureau assumed this work which had been handled since January 1, 1930, by the Committee on Uniform Crime Records of the International Association of Chiefs of Police. During the period indicated, monthly bulletins of crime reports were published by that committee. The Bureau of Investigation plans to continue the monthly bulletins published heretofore, based for the present on the Return A forms of "Offenses known to the police" and this bulletin reflects the returns for the first month as compiled by the bureau.

All contributions of crime data to the Bureau of Investigation are purely voluntary, solicited solely for the purpose of making available statistical information concerning crime to those officially interested organizations and individuals who desire to receive and analyze these statistics. All chiefs of police who have not submitted the Return A forms are invited to do so. The necessary blank forms and the manual Uniform Crime Reporting will be furnished upon request. The manual mentioned, published by the International Association of Chiefs of Police, contains instructions for the preparation of the reports.

At this time the attention of contributors of crime data is invited to the practice prevailing in certain States whereby the State bureau of identification or other similar agency compiles the crime returns and transmits the reports to this bureau. Through the medium of State control, greater accuracy and comprehensiveness will be assured. This practice has been adopted by the States of Ohio and Utah and the results have been encouraging. A report has been received from Ohio indicating that the returns for June and July covered municipalities containing 97 per cent of the total population of all cities in the State, as well as rural territory containing over 60 per cent of all population outside of the cities, together comprising over 83 per cent of the total population of the State. It is noted that these results have been achieved through the cooperation of The Ohio Institute, the State division of identification and the law enforcement agencies over a period of six months on a voluntary basis without supporting compulsory legislation. The suggestion is made that other States, through their bureaus, may desire to assume the responsibility for a similar state-wide compilation of crime returns.

Every effort will be exerted by the Bureau of Investigation to secure from its contributors statistics which are not only accurate, but which will become more comprehensive as time goes on and the methods of compilation are more widely and thoroughly understood. All correspondents are asked to cooperate in this endeavor. The usual monthly forms will be mailed hereafter, as in the past, with the bulletins covering the returns for the previous month and it is requested that such forms, when completed, be returned to the bureau by the seventh day of the next succeeding month. The prompt transmittal of these returns will obviate the necessity for publishing supplemental figures.

Any and all suggestions which officials and interested persons desire to submit to this bureau on the subject of crime reporting will be appreciated and will receive careful study.

Correspondence relating to crime statistics should be addressed to J. Edgar Hoover, Director, Bureau of Investigation, Department of Justice, Washington, D. C.

Offenses Known Tabulated for Larger Cities.

This number of the bulletin contains the reports of "offenses known to the police" during the current month, as shown by returns received from the reporting areas; also supplementary returns for previous months. In addition, current returns for cities of 100,000 population and over, according to the latest available 1930 census population data, are separately tabulated. Reviews of the extent of the crime registration area and of crime trends are included, as well as a complete tabulation of the number of police department employees for all reporting cities for which the information is available.

"Offenses known to the police" include all crimes occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to a group of seven classes of grave offenses, shown by experience to be those most generally and completely reported, and constituting Part I of the Uniform Classification of Offenses. They include *all known crimes* in the designated classes, and not merely arrests or cleared cases. Thus they provide an index to the volume, geographic distribution, and periodic fluctuation of these crimes.

Increase in Size of Reporting Area Continues.

The continuous extension of the crime registration area which has characterized each month of operation of the system of uniform crime reporting is maintained for August also. Returns from 768 cities, located in 44 States, have been filed for the month. In addition, a number of State and county returns have been received including 50 Ohio counties and 11 Utah counties. Alaska and Porto Rico are also represented for August, and supplementary returns have been submitted from Honolulu and the Philippines.

The size of the registration area for crime reporting has more than doubled in the short period of eight months. The number of cities in the continental United States alone which have submitted voluntary returns on crime for any one month or more has grown from 400 in January to a total of 895.

In the table which follows, the distribution of such cities by population groups is shown for cities of 10,000 population and over.

the final official count of the 1930 census figures has not yet been completed, the 1920 census has been employed for all population data as being the best now available for comparative purposes. The table does not include 382 additional cities having a population of 10,000 and under, which are filing returns but for which it has not proved feasible to show population percentages. The combined population of the latter would be well over 1,000,000. The total population of the territories and possessions reporting since January is in excess of 1,500,000.

Population groups	Total number of cities	Cities filing returns		Total population (1920)	Population represented in returns	
		Number	Per cent		Number (1920)	Per cent
Total	746	513	70	44,702,858	32,891,280	74
A. Cities over 200,000	33	30	91	22,712,830	16,303,823	72
B. Cities 100,000 to 200,000	35	30	86	4,706,496	4,048,159	86
C. Cities 50,000 to 100,000	76	60	79	5,265,747	4,277,290	81
D. Cities 25,000 to 50,000	143	109	76	5,075,039	3,924,549	77
E. Cities 10,000 to 25,000	459	284	62	6,942,746	4,337,459	62

As recently as September 3, 1930, preliminary figures for cities of 100,000 inhabitants or more were issued by the Bureau of the Census. These are subject to subsequent revision in the final count. A and B cities in the preceding table have been tentatively reclassified in accordance with the 1930 census figures so far issued, and the number and per cent of such cities now filing crime returns, together with the number and per cent of the population represented, appear as follows.

Population groups	Total number of cities	Cities filing returns		Total population (1930)	Population represented in returns	
		Number	Per cent		Number (1930)	Per cent
Total	94	82	87	36,494,496	27,291,847	75
A. Cities over 200,000	41	36	88	29,711,511	21,330,419	72
B. Cities 100,000 to 200,000	53	46	87	6,782,985	5,961,428	88

Cities Urged to Send in Supplementary Returns.

The extent of the reporting area by State distribution of cities is own in the following table. The monthly number of reporting ies has increased from the original 400 in January to a total of 3 in August. By the process of collecting supplementary returns back months from cities cooperating after January, when the rk was initiated, gaps in the records have been filled and a monthly erage of nearly 750 returns from January to August, inclusive, has een attained. Cities lapsing in any one month and cities commenc- hg to send in returns after January are urged to complete their eturns by sending them in for missing months, thus maintaining for he entire reporting period the extended reporting area which has een established. The importance of this will be readily seen when t is realized that as a rule only cities that have sent in a complete set f returns can be included in any extended statistical treatment. It

is to be noted in connection with the figures which follow that those for January, February, March, April, May, June, and July include all late or supplementary returns for these months, whereas those for August represent the initial returns only. Presumably the total for August will be considerably augmented by supplementary returns, as in the case of the earlier months.
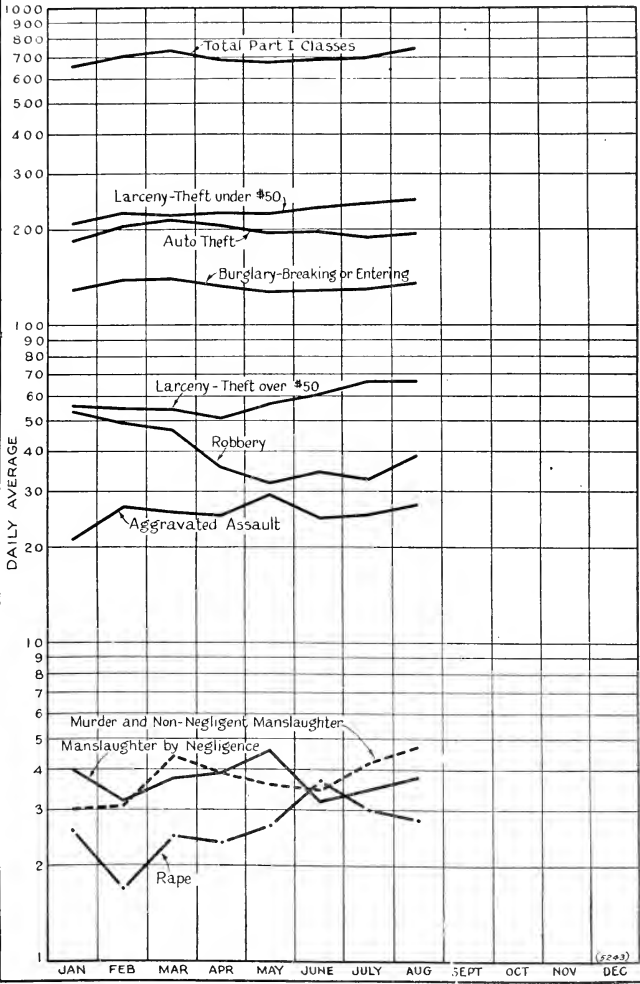

Monthly number of reporting cities

State	January	February	March	April	May	June	July	August
Alabama	2	2	2	3	2	2	2	3

Monthly Crime Trends Depicted for Leading Cities.

The purpose of the chart on trends of crime shown on the opposite page is to depict the volume and monthly fluctuations of crime both as a whole and for the different offense classes. All cities in the continental United States of 100,000 population and over, according to the most recently available 1930 Census Bureau data, which have submitted comparable monthly crime returns for the period covered January to August, inclusive, 1930, form the unit for which monthly trends are shown. In order to avoid the effect of variations in the length of the months represented, the figures plotted represent the average daily number of offenses for each month, rather than the monthly totals of offenses. The chart has been drawn to logarithmic scale in order to present a more accurate comparison of the monthly trends. The crimes included are the offenses in Part I of the Uniform Classification of Offenses.

CHART OF MONTHLY CRIME TRENDS
FOR CITIES OF 100,000 POPULATION AND OVER
JANUARY TO AUGUST 1930

Total Part I Classes

Larceny-Theft under $50

Auto Theft

Burglary-Breaking or Entering

Larceny - Theft over $50

Robbery

Aggravated Assault

Murder and Non-Negligent Manslaughter

Manslaughter by Negligence

Rape

DAILY AVERAGE

JAN   FEB   MAR   APR   MAY   JUNE   JULY   AUG   SEPT   OCT   NOV   DEC

(5243)

Percentage of Offenses Known Continues Comparatively Stable.

The monthly per cent of each offense class to the whole is shown in the following table. It is based on the totals for all offenses reported, as derived from the returns for January, February, March, April, May, June, July, and August, 1930.

Per cent of offenses known

Part I classes of the uniform classification	January	February	March	April	May	June	July	August
Total	100.0	100.0	100.0	100.0	100.0	100.0	100 0	100.0
Murder and non-negligent manslaughter	.5	.4	.5	.5	.5	.5	.6	.6
Manslaughter by negligence	.5	.3	.4	.4	.5	.4	.4	.4
Rape	.6	.3	.4	.4	.4	.6	.5	.5
Robbery	7.9	6.8	6.0	4.9	4.5	4.9	4.8	5.3
Aggravated assault	4.1	3.8	3.5	3.7	4.5	4.2	4.3	4.6
Burglary—breaking or entering	20.6	21.4	20.9	20.7	20.1	19.8	20.1	19.9
Larceny—theft: $50 and over	8.6	8.6	8.2	8.6	8.8	9.2	9.5	9.1
Larceny—theft: Under $50	32.3	31.4	31.8	32.8	32.8	32.9	34.0	34.6
Auto theft	24.9	27.0	28.3	28.0	27.9	27.5	25.8	25.0

Total Volume of Offenses Increases Slightly in August.

A comparison of the total of all reported offenses known to the police for the month of August, according to returns received by the Bureau of Investigation, with the total for the same cities for the previous month, indicates a net increase for the current month. This increase is slightly less than 10 per cent, and is most apparent in the reported offenses of robbery and aggravated assault.

Regularity in Preparing Returns Improves.

A steady improvement in the manner of filling in the monthly return forms has been noted. Attention is directed to the following:

1. The total number of police department employees, including civilians, should be entered each month, regardless of whether the number continues practically unaltered from month to month.

2. No postage stamp is required in using the return envelope provided for remitting returns.

Table I.—*Number of offenses known to the police, August, 1930*

[Arranged according to the Uniform Classification of Offenses, Part I]

| State and city | Total | Felonious homicide | | Rape | Robbery | Aggravated assault | Burglary—Breaking or entering | Larceny—Theft | | Auto theft |

Total Police Department Employees Tabulated.

The number of police department employees for cities of 10,000 population and over according to the 1930 census was published in the July issue of Uniform Crime Reports. The same information for cities of under 10,000 population is presented in the current issue. It has been deemed advisable to republish in this issue the tabulations for cities of 10,000 population and over, so as to assemble in one place the entire figures for all cities for which they are at present available. This gives opportunity also for a thorough revision and extension of the table published in the July bulletin. In a number of instances additional census figures are now available; in others, revised figures have been issued by the Census Bureau and are substituted for those printed last month. A number of cities have submitted data on department employees only since the printing of the last bulletin.

Information as to the number of department employees is taken direct from Return A, the monthly return of offenses known to the police, as submitted from January to June, inclusive, of 1930. A representative number for each department has been selected, based on either the predominating entry for the months included, or an average taken from such entries where there is some variation from month to month. The number of employees *includes civilians*, in addition to the regular force, in all departments where civilians also are employed. The population data are current and are taken direct from the most recent 1930 releases of the United States Bureau of the Census. As these are not entirely complete at the moment of going to press, some cities are necessarily omitted, while the population figures for others are subject to later revision. For comparative purposes, the cities are classified into six population groups, namely, those of over 200,000, 100,000 to 200,000, 50,000 to 100,000, 25,000

to 50,000, 10,000 to 50,000, and those of under 10,000 population. The number of employees per 1,000 population is also shown. Over 700 cities are represented, and omissions are in most cases due either to the fact that (1) the city in question has failed to specify its number of police department employees on the monthly return forms; or (2) 1930 population figures are not available at the moment of going to press.

TABLE IV.—*Total police department employees*

Population groups	Population, 1930	Total police department employees	Number per 1,000 population
A. CITIES OVER 200,000 POPULATION			
Akron, Ohio	253, 653	190	0. 7

UNIFORM
CRIME REPORTS

FOR THE UNITED STATES
AND ITS POSSESSIONS

Volume I - Number 2

MONTHLY BULLETIN FOR SEPTEMBER, 1930

ADVISORY
COMMITTEE OF THE
INTERNATIONAL ASSOCIATION OF CHIEFS OF POLICE
ON UNIFORM CRIME RECORDS
(II)

UNIFORM CRIME REPORTS

Volume 1	SEPTEMBER, 1930	Number 2

Offenses Known Tabulated for First Three Quarters.

This issue of the bulletin contains a comparative table of offenses known to the police compiled from the monthly returns submitted by cities of over 100,000 population for the period extending from January 1 to September 30, 1930, inclusive.

This period embraces the first three quarters of the current year and the returns are tabulated to show the totals for the first two quarters and those of each of the three months which comprise the third quarter. The bulletin also contains the usual table reflecting the results of crime returns submitted for the month of September by contributing police departments throughout the country and three of the possessions. Reviews of the extent of the crime registration area and of crime trends are also included. Returns from counties in several States are shown, together with supplementary returns from police departments in various States and the possessions.

"Offenses known to the police" include those crimes designated as Part I classes of the uniform classification, occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to the following group of seven classes of grave offenses, shown by experience to be the most generally and completely reported: Felonious homicide including (*a*) murder, nonnegligent manslaughter, and (*b*) manslaughter by negligence; rape; robbery; aggravated assault; burglary—breaking or entering; larceny—theft, including (*a*) thefts of $50 and over, and (*b*) thefts of under $50, and auto theft.

"Offenses known to the police" include, therefore, all of the above offenses which are reported by the police departments of contributing cities, and not merely arrests or cleared cases.

Reporting Area Expands Gradually.

During the current month returns were received from 793 cities located in 44 states, and the District of Columbia. In addition to the data submitted by these police departments, a number of State and county returns have been received. The figures on offenses known to the police contained in these latter reports are exclusive of those reported by police departments.

Current returns were also received from Alaska, Porto Rico, and Hawaii, while returns for previous months were forwarded from Alaska and the Philippines.

The reporting area of cities submitting monthly crime statistics continues to expand gradually. The number of cities contributing in January, 1930, when the system was inaugurated, was 400. With this issue of the bulletin the number of cities which have reported during any one month reached 931, of which the majority are regular contributors.

In the table which follows, the number and per cent of cities now filing crime returns, together with the number and per cent of the population represented, are shown for cities of 25,000 population and over. The classification is based on preliminary figures for cities of 25,000 inhabitants or more, issued during September, 1930, by the Bureau of the Census. These figures are subject to revision in the final count. In addition there are approximately 300 cities of populations from 10,000 to 25,000, with an estimated combined population of 4,500,000, and approximately 345 cities of a population under 10,000, with an estimated total population of 2,000,000, which have contributed returns. The population of the territories and possessions reporting since January is estimated to be approximately 2,000,000.

Population groups	Total number of cities	Cities filing returns		Total population (1930)	Population represented in returns	
		Number	Per cent		Number (1930)	Per cent
Total	364	286	76	48, 883, 174	36, 904, 801	75
A. Cities over 200,000	41	36	88	29, 711, 511	21, 330, 419	72
B. Cities 100,000 to 200,000	53	47	89	6, 782, 985	6, 062, 762	89
C. Cities 50,000 to 100,000	97	77	79	6, 373, 542	5, 022, 917	79
D. Cities 25,000 to 50,000	173	126	73	6, 015, 136	4, 488, 703	75

The above table does not include 645 cities of a population less than 25,000, aggregating a total of 6,500,000 from which returns are received.

Officials Requested to Submit Supplementary Returns.

The following table indicates the extent of the reporting area by States, for monthly periods from January to September, 1930, inclusive. This area is maintained by collecting supplementary returns from cities which began contributing subsequent to the first issue of the bulletin. Cities failing to submit returns during any particular month, and cities which commenced contributing after January are requested to send in figures for the missing months. In this manner the reporting area established for the entire period may be maintained. This practice of forwarding supplementary returns is highly desirable. By contributing such returns, cities will assist materially in making available more comprehensive figures for a wide reporting area.

In the table which follows the figures for the months of January to August, inclusive, include all late or supplementary returns for these months, while those for September represent the initial returns only.

Monthly number of reporting cities

| State	January	February	March	April	May	June	July	August	September

Total Volume of Offenses Shows Very Slight Increase.

A comparison of the total of crimes reported for the month of August with the total for the month of September, submitted by comparable cities, indicates a very slight increase in the net volume of offenses for September. Due allowance was made for the fact that the reporting period in August was one day longer than in September.

Monthly Crime Trend Chart.

The chart on the following page is based on comparable monthly crime returns submitted for the period covered, January to September, 1930, inclusive, by 58 cities of the United States with a population of 100,000 and over, according to available 1930 Census Bureau data. The cities included in the chart have furnished complete reports on the offenses indicated for the above period. The chart is based on the average daily number of offenses for each month, rather than the monthly totals of offenses. The crimes included are the offenses in Part I of the Uniform Classification of Offenses.

4

CHART OF MONTHLY CRIME TRENDS
FOR CITIES OF 100,000 POPULATION AND OVER
JANUARY TO SEPTEMBER 1930

Percentage of Offenses Known Continues Comparatively Stable.

The monthly per cent of each offense class to the whole is shown in the following table. It is based on the totals for all offenses reported, as derived from the returns for January to September, inclusive, 1930.

Per cent of offenses known

Part I classes of the uniform classification	January	February	March	April	May	June	July	August	September
Total_____	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Murder and non-negligent manslaughter_____	.5	.4	.5	.5	.5	.5	.6	.6	.6

Auto theft_____	24.9	27.0	28.3	28.0	27.9	27.5	25.8	25.0	26.0

Prompt Mailing of Returns Urged.

Officials contributing monthly returns on crime statistics to the Bureau of Investigation are requested to forward the "Return A" as promptly after the close of the month as conveniently possible.

If the bulletin, tally sheet, and "Return A" are not received within a few days after the 1st of each month, this bureau should be notified, and the same will be mailed immediately.

Forwarding the returns on or before the 7th of each month will facilitate the compilation and tabulation of the data.

Part I. COMPARATIVE TABULATIONS

TABLE A.—*Recapitulation of known offenses for cities of 100,000 population and over* †

[First three quarters, 1930]

Volume I - Number 3

MONTHLY BULLETIN FOR OCTOBER, 1930

\

ADVISORY

COMMITTEE ON UNIFORM CRIME RECORDS
OF THE
INTERNATIONAL ASSOCIATION OF CHIEFS OF POLICE

(II)

UNIFORM CRIME REPORTS

Contents of the October Bulletin.

The current number of the bulletin contains the usual table of offenses known to the police reported for the month of October. Reviews of the crime registration area and crime trends, with special reference to the offenses of robbery and burglary for the first nine months of the year, are also included. In addition, tables are shown reflecting the number of current and supplementary returns received from the various States, by months.

"Offenses known to the police" include those crimes designated as Part I Classes of the Uniform Classification, occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to the following group of seven classes of grave offenses, shown by experience to be those most generally and completely reported: Felonious homicide, including (*a*) murder, nonnegligent manslaughter, and (*b*) manslaughter by negligence; rape; robbery; aggravated assault; burglary—breaking or entering; larceny—theft, including (*a*) thefts of $50 and over, and (*b*) thefts of under $50; and auto theft.

"Offenses known to the police" include, therefore, all of the above offenses which are reported by the police departments of contributing cities, and not merely arrests or cleared cases.

Expansion of Total Crime Reporting Area Continues.

During the current month returns were received from 879 cities. For the first time, every State in the Union is represented, as well as the District of Columbia. Alaska also has now submitted returns for each of the four judicial divisions. In addition, a number of State and county returns have been received, including for the first time the Rhode Island State police and the six troops of the New York State police. The figures on offenses known to the police contained in these latter reports are exclusive of those reported by police departments.

Current returns were received from Alaska and Porto Rico, while returns for previous months were forwarded from Alaska and the Philippines.

The reporting area for cities submitting crime returns shows continued expansion. With this issue of the bulletin the number of cities which have reported during any one month—as distinguished from the number of returns received for October only—reached 1,030, of which the majority are regular contributors.

In the table which follows, the number and per cent of cities now filing crime returns, together with the number and per cent of the population represented, are shown for cities and towns of 25,000 inhabitants or more. The classification is based on the most recently

available figures issued during 1930 by the Bureau of the Census. These figures are subject to revision in the final count. In addition, there are 344 cities of a population from 10,000 to 25,000, with an estimated combined population of 5,500,000, and 384 cities of a population under 10,000, with an estimated total population of 2,100,000, which have contributed returns. The population of the Territories and possessions reporting since January is estimated at more than 2,000,000.

Population groups	Total number of cities or towns	Cities filing returns		Total population (1930)	Population represented in returns	
		Number	Per cent		Number (1930)	Per cent
Total	368	302	82	49,031,812	37,508,765	76
A. Cities over 200,000	41	36	88	29,711,511	21,330,419	72
B. Cities 100,000 to 200,000	53	48	91	6,782,985	6,164,179	91
C. Cities 50,000 to 100,000	97	77	79	6,373,542	5,022,917	79
D. Cities 25,000 to 50,000	177	141	80	6,163,774	4,991,250	81

The above table does not include 728 cities of a population less than 25,000, aggregating a total of 7,600,000, from which returns are received.

Current Returns Show Monthly Increase.

The following table shows the number of returns received and published each month, exclusive of supplementary reports. It will be observed that the total number of current returns received for October exceeds those received for September by 86. This increase represents an unusually high percentage of new contributors.

Submission of Supplementary Returns Requested.

In the table which follows, the total number of monthly returns received for each month from January to September, inclusive, 1930, is shown, including supplementary returns. During the current month approximately 375 returns for previous months were received. These were forwarded mostly by cities which only recently became contributors of crime statistics, although some few were received from cities which may have failed previously to furnish a return for a particular month. Contributors are urged to continue this practice of forwarding supplementary returns so that the reporting area established may be maintained for the entire year.

Robbery and Burglary Figures for Nine Months Tabulated.

One of the purposes of collecting and publishing crime statistics is to show, as adequately as can be determined from the data available, the rise and decline in crime, or in certain selected crimes, over a given period of time. Figures on the selected offenses of robbery and burglary, taken from the returns of 695 cities, have accordingly been compiled, covering the first nine months of 1930. The number of cities used was determined by the number contributing returns on these offenses for the entire period. It does not purport therefore to include all cities in the country, nor even all that have at any time submitted a return. It is merely a miscellaneous group, drawn from cities of all sizes and in various sections of the country. It does include, however, approximately 80 per cent of all cities of 100,000 population and over, 70 per cent of all cities of from 50,000 to 100,000 population, 60 per cent of cities of from 25,000 to 50,000 population, as well as a smaller proportion but far larger number of cities of under 25,000 population.

The offenses of robbery and burglary have been selected for the reason that they are reported probably more widely and accurately than any other reportable offenses. There is less motive for concealment of these offenses on the part of victims than may exist in connection with certain other types of crime, and their serious character, both with regard to the individual victim and to the community, makes it likely that they will normally be reported.

To maintain the figures on a comparable period of time, the average daily number of offenses for each month is shown, rather than the monthly total, in order to offset variations in the number of days in each month. The average daily number of offenses, as reported by 695 cities, appears as follows:

	January	February	March	April	May	June	July	August	September
Robbery	133	123	110	89	84	83	88	101	100
Burglary	297	341	328	308	297	295	296	312	317

The above figures suggest a comparison with those for robbery and burglary depicted on the crime trend chart (including all Part I classes of offenses) published in the bulletin each month, representing 58 cities of 100,000 population and over. Cities of 100,000 population and over comprise only about one-ninth of the 695 miscellaneous cities represented in the above figures; almost two-thirds of the latter are of less than 25,000 population. It will be noted from the comparative chart appearing on the opposite page that while the
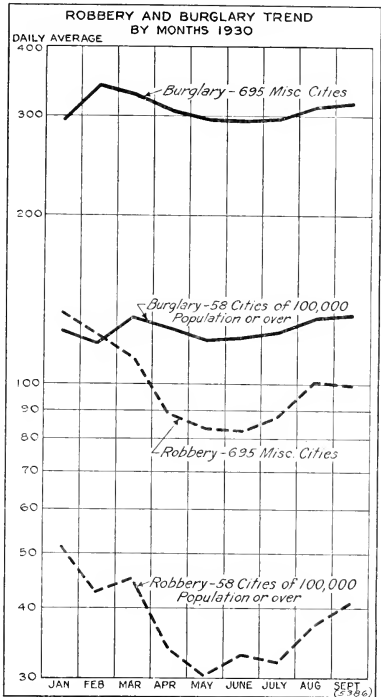

month by month fluctuation is not always parallel, the general trend throughout the 9-month period is in approximately the same direction.

Altogether, three times as many burglaries were reported for the 9-month period as were robberies. As is naturally to be expected, the great majority of both classes of offenses was reported from the large population centers. The distribution of these offenses by population groups shows that more than two-thirds of the robbery offenses were reported from cities of 200,000 population and over, while well over half the burglary offenses were reported from the same groups. On the basis of the average number of offenses reported per city from cities in each population group, it appears that cities of 200,000 population and over reported an average of nearly seven times as many robberies and nearly four times as many burglaries as cities in the next group, i. e., 100,000 to 200,-000 population. Cities of 100,000 to 200,000 population reported an average of two and a half times as many robberies, also burglaries, as cities of 50,000 to 100,000 population. The same relation appeared between cities of 50,000 to 100,000 population and cities of 25,000 to 50,000 population; that is, an average of two and a half times as many robberies, also burglaries, was reported by the former. As between cities of 25,000 to 50,000 population and cities of less than 25,000 population, the average for the former for both robberies and burglaries was three and a half times that of the latter.

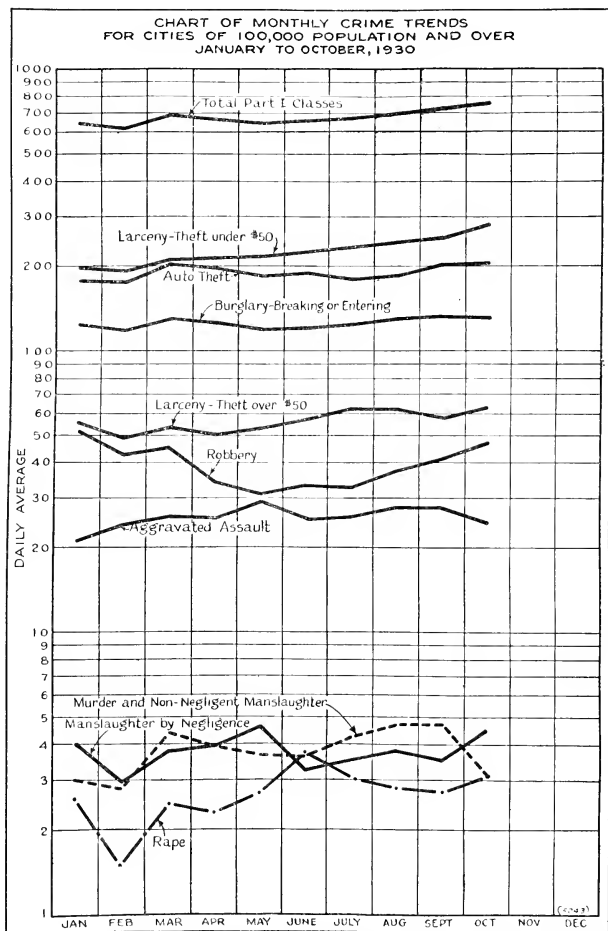

ROBBERY AND BURGLARY TREND BY MONTHS 1930

For the fluctuation in robbery and burglary, as well as the other reportable offenses, for the current month attention is directed to the paragraph on this subject appearing on page 6. The trend for the larger cities only—that is, cities of 100,000 population and over—from January to October, inclusive, may be found in the chart appearing also on page 6.

Monthly Crime Trend Chart.

The chart on the following page is based on monthly crime returns submitted for the period covered, January to October, 1930, inclusive, by 58 cities of the United States with a population of 100,000 and

over, according to available 1930 Census Bureau data. The cities included in the chart have furnished complete reports on the offenses indicated for the above period. The chart is based on the average daily number of offenses for each month, rather than the monthly

CHART OF MONTHLY CRIME TRENDS
FOR CITIES OF 100,000 POPULATION AND OVER
JANUARY TO OCTOBER, 1930

totals of offenses. The crimes included are the offenses in Part I of the Uniform Classification of Offenses.

Notable Rise in Robbery Continues.

The total offenses of all reporting cities in October which submitted complete returns in September, also, shows, upon comparison, a

very slight net increase. Considerable fluctuation appears, however, within the various offense classes. The increase in robbery, apparent since June but practically at a standstill at the time of the last monthly comparison, is resumed decidedly in October. Aggravated assaults show a noticeable decrease, while offenses of larceny-theft under $50 increased in about the same ratio. Burglary declined somewhat, though not sufficiently to warrant any special comment. In this comparison, due allowance is made for the fact that the reporting period in October was one day longer than in September. Offenses of felonious homicide and rape are eliminated from the comparison, as the figures on these offenses for the monthly period are too small to merit consideration of this sort.

Percentage Table of Part I Offenses.

The monthly per cent of each offense class to the whole is shown in the following table. It is based on the totals for all offenses reported, as derived from the returns for January to October, inclusive, 1930.

Per cent of offenses known

Part I classes of the uniform classification	January	February	March	April	May	June	July	August	September	October
Total	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

Annual Returns of Offenses Known and Persons Charged.

Forms will be distributed in the near future to officials who have at any time contributed crime statistics since January 1, 1930, for submitting annual returns on offenses known to the police and on the number of persons charged. For the present time figures will be confined to the Part I Classes of the Uniform Classification of Offenses; that is, those offenses listed on the monthly return. The forms to be used are designated return B and return C, respectively. It is desired that departments contributing annual returns forward the data to the Bureau of Investigation on or before February 1, 1931.

The information required in returns B and C will cover the period from January 1 to December 31, inclusive, 1930.

When these forms are distributed, the Bureau of Investigation will be glad to render any advice or assistance desired in connection with their preparation. It is hoped that as many officials as possible will cooperate in contributing the annual returns.

Instructions for Recording Burglaries.

It has been noted that some few departments have recorded a particular offense both as burglary and larceny. In other words, where only one offense has been reported, it has been recorded as two offenses. It should be observed that where a larceny is committed in connection with a burglary, only the more serious offense, that is the burglary, should be recorded.

CRIME REPORTS

FOR THE UNITED STATES
AND ITS POSSESSIONS

Volume I - Number 4

MONTHLY BULLETIN FOR NOVEMBER, 1930

ADVISORY

COMMITTEE ON UNIFORM CRIME RECORDS
OF THE
INTERNATIONAL ASSOCIATION OF CHIEFS OF POLICE

(II)

UNIFORM CRIME REPORTS

Contents of the November Bulletin.

This issue of the bulletin contains the usual table reflecting the results of returns on offenses known to the police received by the Bureau of Investigation for the month of November. Crime trends as indicated by the returns from contributing police departments are noted, the crime registration area reviewed, and tables showing the number of current and supplementary returns by States are shown. Current returns are those which were submitted for the month of November, while supplementary returns are those which were received since publication of the previous bulletin but which contain the figures for months prior to November.

"Offenses known to the police" include those crimes designated as Part I Classes of the Uniform Classification, occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to the following group of seven classes of grave offenses, shown by experience to be those most generally and completely reported: Felonious homicide, including (a) murder, nonnegligent manslaughter, and (b) manslaughter by negligence; rape; robbery; aggravated assault; burglary—breaking or entering; larceny—theft, including (a) thefts of $50 and over, and (b) thefts of under $50; and auto theft.

"Offenses known to the police" include, therefore, all of the above offenses which are reported by the police departments of contributing cities, and not merely arrests or cleared cases.

Crime Reporting Area Expands.

Police departments of 942 cities of the country contributed returns for the month of November. Of this number there were 68 cities from which figures were received for the first time. Current returns from the first and third divisions of Alaska and from Porto Rico were also received, while supplementary returns were forwarded from Alaska, Hawaii, and the Philippines. State police and sheriffs from a few States also submitted returns which are exclusive of the figures received from urban police departments.

As noted above the area represented by cities which have submitted returns during any one month shows gradual expansion. With the publication of this issue of the bulletin the total number of cities which

have at any time during the current year submitted returns reached 1,098.

In the following table the number and per cent of the cities and the number and per cent of the population represented are shown for those cities and towns of 25,000 inhabitants or more which have contributed returns for at least one month.

The classification is based on the 1930 figures issued by the Bureau of the Census. In addition to the cities contained in the chart there are 358 cities of a population from 10,000 to 25,000, with an estimated total population of 5,700,000, and 436 cities of a population less than 10,000, with an estimated combined population of 2,350,000 which have contributed returns. The population of the Territories and possessions which have reported at any time since January is estimated to be approximately 2,000,000.

Population groups	Total number of cities or towns	Cities filing returns		Total population (1930)	Population represented in returns	
		Number	Per cent		Number (1930)	Per cent
Total	368	304	83	49, 031, 812	37, 619, 965	77
A. Cities over 200,000	41	36	88	29, 711, 511	21, 330, 419	72
B. Cities 100,000 to 200,000	53	48	91	6, 782, 985	6, 164, 179	91
C. Cities 50,000 to 100,000	97	79	81	6, 373, 542	5, 134, 117	80
D. Cities 25,000 to 50,000	177	141	80	6, 163, 774	4, 991, 250	81

The above table does not include 794 cities of a population less than 25,000, aggregating a total of 8,050,000 from which returns are received.

Number of Current Returns Increases.

In the table on the opposite page is shown the number of returns by States received and published, exclusive of supplementary returns. It will be noted that the number of cities contributing current returns has increased from 399 in January to 942 in November.

Supplementary Returns Requested.

Cities which have failed to contribute returns for each month of the current year are urged to do so. In this manner figures for the entire period from all contributing cities will be available. The Bureau of Investigation will be pleased to furnish the necessary forms for this purpose. In the table on the following page the total number of returns received for each month from January to October inclusive, 1930, is shown.

Monthly Crime Trend Chart.

The chart on the opposite page is based on crime returns submitted monthly from January to November, 1930, inclusive, by 58 cities of the United States with a population of 100,000 or more each, according to available 1930 Census Bureau data. The cities included in the chart have furnished returns on the offenses indicated for the above period. It is based on the average daily number of offenses for each month, and the crimes included are the offenses of the Part I Classes of the Uniform Classification of Offenses.

The chart does not represent trends for all contributing cities, but, as noted above, is based on the figures submitted for a period of 11 months by 58 of the larger cities of the country.

CHART OF MONTHLY CRIME TRENDS
FOR CITIES OF 100,000 POPULATION AND OVER
JANUARY TO NOVEMBER 1930

Robbery Increase Continues.

A comparison of the figures for October submitted by cities of miscellaneous sizes, with those submitted by the same cities for November, indicates that the number of offenses of robbery reported by those cities for November shows a moderate increase over the number reported for October. There was a slight increase shown in

the number of offenses of burglary—breaking or entering reported. The fluctuations in the offenses of aggravated assault, larceny—theft, and auto theft were negligible, each offense showing a very slight increase. Felonious homicide and rape were not included as the figures received on these offenses are relatively too insignificant to merit comparison.

The above treatment is confined to returns from cities which submitted figures on offenses known both in October and November, and is exclusive of incomplete and defective returns.

Percentage Table of Part I Offenses.

The monthly per cent of each offense class to the whole is shown in the following table. It is based on the total offenses reported by all contributing cities, exclusive of defective and incomplete returns.

Per cent of offenses known

Part 1 classes of the uniform classification	January	February	March	April	May	June	July	August	September	October	November
Total	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

Auto theft	24.9	27.0	28.3	28.0	27.9	27.5	25.8	25.0	26.0	25.4	24.7

Annual Return Forms Distributed.

Forms B and C for the annual returns on offenses known and persons charged respectively have been distributed to all officials who have contributed crime statistics during the current year. Police departments contributing annual figures are requested to mail the forms in the envelopes provided, on or before February 1, 1931. In the event these forms have not been received by any department desiring to contribute the information requested, please communicate with the Bureau of Investigation and they will be forwarded immediately.

Unfounded Offense Defined.

An unfounded offense is one which upon investigation proved to be groundless. In other words, the offense reported to the police department or sheriff's office was never committed. The number of unfounded offenses should be subtracted from the number of actual offenses reported.

Cities Urged to Expedite Mailing Returns.

Police officials contributing crime statistics are urged to forward the monthly returns whenever possible, on or before the seventh day of each month. Prompt submission of the returns facilitates compiling the data received.

TABLE I.—*Number of offenses known to the police, November, 1930*

UNIFORM
CRIME REPORTS

FOR THE UNITED STATES
AND ITS POSSESSIONS

Volume I - Number 5

MONTHLY BULLETIN FOR DECEMBER, 1930

*Issued by the
Bureau of Investigation
United States Department of Justice
Washington, D. C.*

ADVISORY

COMMITTEE ON UNIFORM CRIME RECORDS
OF THE
INTERNATIONAL ASSOCIATION OF CHIEFS OF POLICE

(II)

UNIFORM CRIME REPORTS

Offenses of Larger Cities Tabulated for 1930.

This issue of the bulletin contains a table showing the number of offenses of the Part I classes known to the police for the four quarters of 1930, as reported to the Bureau of Investigation by 84 cities of 100,000 population and over. In some instances returns were not received for the entire year and notations to that effect have been made in the table wherever necessary. The bulletin also includes the table of offenses known as reported by contributing police departments for December, and reviews of the crime registration area and of crime trends in the designated classes as reflected by the figures received. Current and supplementary returns are also shown for a number of counties in various States and for several of the possessions. In addition reports from State police in Massachusetts, New Jersey, New York, and Rhode Island are included.

"Offenses known to the police" include those crimes designated as Part I Classes of the Uniform Classification, occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to the following group of seven classes of grave offenses, shown by experience to be those most generally and completely reported: Felonious homicide, including (a) murder, nonnegligent manslaughter, and (b) manslaughter by negligence; rape; robbery; aggravated assault; burglary—breaking or entering; larceny—theft, including (a) thefts of $50 and over, and (b) thefts of under $50; and auto theft.

"Offenses known to the police" include, therefore, all of the above offenses which are reported by the police departments of contributing cities, and not merely arrests or cleared cases.

Increase in Extent of Reporting Area Continues.

The gradual expansion of the area represented by the returns received, which marked each successive month of the past year, continued in December. Police departments of 1,002 cities submitted figures on offenses known for last month. In addition either current or supplementary returns were received from Alaska, Hawaii, Porto Rico, and the Philippines.

The number of cities which at any time during the past year contributed returns reached 1,127. This figure represents the total number of police departments from which returns were received for any one month but the majority are regular contributors.

The table which follows indicates the number and per cent of the cities, together with the number and per cent of the population, for those cities and towns of 25,000 inhabitants or more which contributed returns at any time during 1930. The classification is based on the polulation figures issued recently by the Bureau of the Census.

Supplementing the number of cities contained in the chart are 363 cities of a population from 10,000 to 25,000, with an estimated total population of 5,777,000 and 457 cities of a population less than 10,000, with an estimated combined population of 2,443,000, which contributed returns. The population of the Territories and possessions from which returns were received at any time during the year is estimated to be approximately 2,000,000.

Population groups	Total number of cities or towns	Cities filing returns		Total population (1930)	Population represented in returns	
		Num-ber	Per cent		Number (1930)	Per cent
Total	368	307	83	49,031,812	37,709,965	77
A. Cities over 200,000	41	36	88	29,711,511	21,330,419	72
B. Cities 100,000 to 200,000	53	48	91	6,782,985	6,164,179	91
C. Cities 50,000 to 100,000	97	79	81	6,373,542	5,134,117	80
D. Cities 25,000 to 50,000	177	144	81	6,163,774	5,081,250	82

The above table does not include 820 cities of a population less than 25,000, aggregating a total of 8,220,000 from which returns are received.

Number of Contributors Increases Substantially.

For the month of December returns were received from police departments in 1,002 cities throughout the country. Thus at the close of the first year of uniform crime reporting the number of contributing cities, exclusive of counties and others, showed a steady increase from January, when 399 returns were received, to December, when the number reached 1,002.

In the table which follows the number of returns by States, received and published currently, exclusive of supplementary returns, is shown.

Monthly number of returns published currently

[1] Revised.

Returns for Previous Months Requested.

In the table which follows is shown, by States, the total number of returns, both current and supplementary, received for each month from January to November, 1930. It will be noted that the table contains a revision of the figures as shown in the last issue of the bulletin.

It is highly desirable to maintain the reporting area established and accordingly cities which have omitted to send returns for each month in 1930 are requested to do so, if the figures are available.
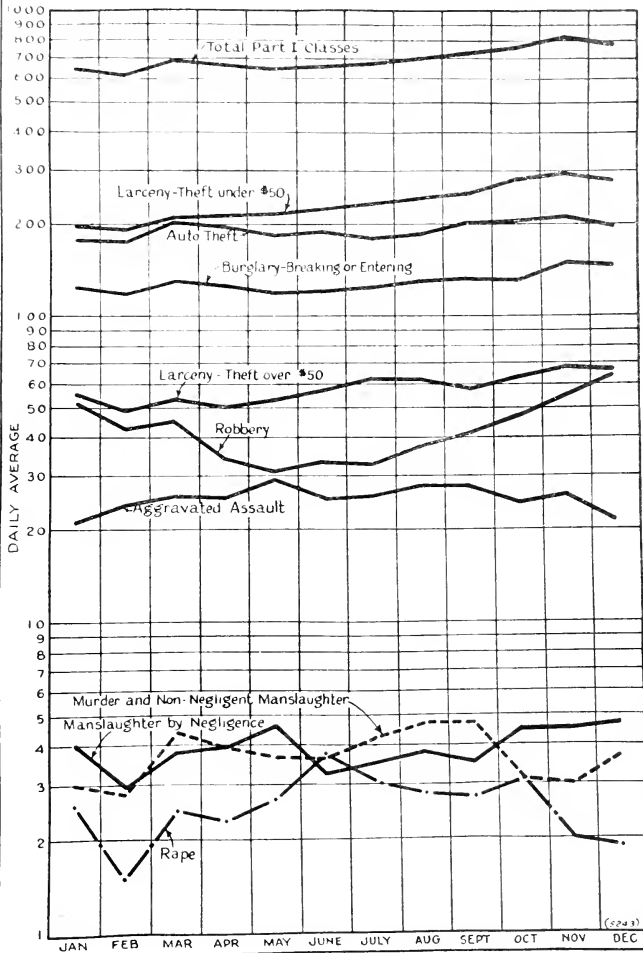

Total monthly returns including supplementaries

Monthly Crime Trend Chart.

The chart on the opposite page is based on crime returns submitted monthly from January to December, 1930, inclusive, by 58 cities of the United States with a population of 100,000 or more each, according to available 1930 Census Bureau data. The cities included in the chart furnished returns on the offenses indicated for the above period. It is based on the average daily number of offenses for each month, and the crimes included are the offenses of the Part I Classes of the Uniform Classification of Offenses.

The chart does not represent trends for all contributing cities, but, as noted above, is based on the figures submitted for a period of one year by 58 of the larger cities of the country.

CHART OF MONTHLY CRIME TRENDS
FOR CITIES OF 100,000 POPULATION AND OVER
JANUARY TO DECEMBER 1930

Fluctuations for December Negligible.

Exclusive of defective and incomplete returns, a comparison of the figures submitted by cities which contributed returns for November and December indicates that the fluctuations in the number of offenses of the Part I Classes in December, with the exception of robbery, were practically insignificant. The number of offenses of robbery reported, however, continued to show a slight increase in December as in previous months. Due allowance was made in the comparison for the fact that the reporting period in December was one day longer than in November.

Percentage Table of Part I Offenses.

The monthly per cent of each offense class to the whole is shown in the following table. It is based on the total offenses reported by all contributing cities, exclusive of defective and incomplete returns.

Per cent of offenses known

Part I classes of the uniform classification	January	February	March	April	May	June	July	August	September	October	November	December
Total	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

Auto theft	24.9	27.0	28.3	28.0	27.9	27.5	25.8	25.0	26.0	25.4	24.7	23.7

Annual Returns Received.

A substantial number of annual returns for 1930 on the number of offenses known to the police and the number of persons charged, of the Part I Classes of the Uniform Classification of Offenses, have been received. A great many of these are, however, incomplete. Nevertheless it is desirable to receive as much of the data as may be available and the Bureau of Investigation will be pleased to render any assistance possible in the preparation of these returns. It is suggested that if any cities desirous of contributing the annual figures require additional copies of the Forms B and C the Bureau of Investigation be notified and they will be forwarded promptly.

Method of Scoring Offenses of Aggravated Assault.

The attention of contributors is invited to the fact that only those serious assaults most likely to result in severe bodily injury or death should be recorded in the aggravated assault class. Figures on offenses of this nature are, therefore, confined to serious or aggravated cases, and all simple assaults and assaults of a petty nature should not be included in the monthly returns.
